

Job Description for Wiring Technician

Overview

Chess Dynamics is an established Leading Design & Manufacturing business, with several sites across the UK. Our product range is cutting-edge and services the surveillance and defense industries with products that aid specific client requirements - driving innovation is at the heart of everything we do.

As a Wirer, you will be working in a small production environment and will be responsible for the assembly of electro mechanical bespoke products, ensuring work gets completed to tight deadlines.

Key Responsibilities:

- Working on both prototype and production assemblies, accurately assembling equipment to drawings.
- Ensuring any modifications during the Build process are documented and highlighted to the Team Leader so change requests can be implemented.
- Use a variety of hand and power tools to complete mechanical assembly of components
- Labelling of parts during assembly ensuring serial numbers are documented where necessary
- Assist Electrical personnel with the assembly and fitting of cable looms.
- Ensure that all documentation related to your work is kept accurate and up to date
- Liaise with production control when kits are incomplete
- Help organise and control the workshop areas, ensuring these areas are kept tidy.
- Effective communications with engineering team to sort out issues during the build
- Checking that all work meets quality and technical standards

The Successful Applicant:

- Several years' previous experience within a small production environment is essential
- Strong panel wiring and cabling skills combined with the ability to use hand and power tools
- Ability to work from engineering drawings accurately and to tight deadlines is required
- Candidates must be happy working in a fast-paced environment with changing priorities.

What's on Offer

A competitive salary with benefits including 26 days Annual holiday (Plus Bank Holidays), Contributory Pension, Income Protection, Childcare Vouchers and a High-Street Discounts Scheme.
