

Job Description for an Assembler

Overview

Chess Dynamics is an established Leading Design & Manufacturing business, with several sites across the UK. Our product range is cutting-edge and services the surveillance and defense industries with products that aid specific client requirements - driving innovation is at the heart of everything we do.

We currently require an experienced Assembly Operator to be responsible for the production of Electro-Mechanical products and systems.

Key Responsibilities:

- Main production work will involve accurate assembly of Equipment to Engineering drawings and procedures to lead times set by the production planning department
- Use a variety of hand and power tools following appropriate methods to complete mechanical assembly of components
- Labelling of parts during assembly ensuring serial numbers are documented where necessary
- Assist Electrical personnel with the assembly and fitting of cable looms.
- Ensure that all documentation related to your work is kept accurate and up to date
- Liaise with production control when kits are incomplete
- Help organise and control the workshop areas, ensuring these areas are kept tidy.
- Effective communications with engineering team to sort out issues during the build
- Checking that all work meets quality and technical standards

The Successful Applicant:

- Several years' previous experience within an electro-mechanical production environment is essential.
- Good use of hand tools with the ability to work from engineering drawings is required.
- Ability to work with other production teams to ensure the final build is delivered successfully
-

What's on Offer

A competitive salary with benefits including 26 days Annual holiday (Plus Bank Holidays), Contributory Pension, Income Protection, Childcare Vouchers and a High-Street Discounts Scheme.
